

Paul Knows Buildings

Tackling Each Project From Bottom to Top

At the confluence of his passion for art, interest in mathematics, and aptitude for physics — Paul Kushner was destined for the field of architecture and construction. After earning his degree from Berkeley, Paul began his career framing and digging ditches — making for a unique mix of technical expertise and in-the-field experience.

After working his way up in the industry, he started his own architectural consulting business — where he provided architectural services for postlitigation reconstruction projects and construction defect litigation support.

What You Might Not Know About Paul

As a respected figure in the community, you're likely already familiar with Paul. However, many don't realize the depth of his practical expertise.

Not only does Paul testify as an expert in the field — but due to his dual position as both an expert witness and architect, he is also often responsible for implementing the conclusions he draws. He has over three decades of experience, including 480-unit buildings and budgets exceeding \$12 million — meaning you can expect practical answers in the courtroom, and authentic solutions in the field.

Leaving No Stone Unturned

As an Architecture Expert with Pete Fowler Construction Services, Inc (PFCS), Paul conducts research, performs inspections, and his tenacity allows him to produce thorough, consistent results in the face of challenging building problems and construction organizations.
